

## Introducing SCM Pharma

Niche contract manufacturing - novel,  
difficult and dangerous drugs

June 14 2010 – Gothenburg, Sweden

# SCM Pharma – who we are and what we do...

- **Contract manufacturing organisation (CMO)**
- **North East England – two sites**
  - (Prudhoe & Stocksfield)
- **Independently owned business with 50 staff**
- **MHRA-licensed purpose-built facility**
- **Manufacture and supply drug products for pre clinical and clinical trials in addition to commercially licensed medicines in niche/low volume markets**
- **GMP-compliant development, manufacturing, filling, testing, packaging & QP release**
- **Sterile fill/finish expertise that includes aseptic processing and terminal sterilisation**
- **Specialist services included filling of radio-labelled, potent and biological products – novel, difficult and dangerous**
- **Produce liquid, gel, cream and powder drug products in various presentations including vials, ampoules, capsules syringes, tubes and bottles.**

# SCM Pharma – why are we here?

**SCM Pharma is a fast-growing specialist CMO and is now looking to expand into new markets...first stop...Sweden.**

- Generally, an increasing global trend towards outsourcing from big and speciality pharmaceutical companies
- Sweden is one of the 'big' European markets developing biotech drugs...most of these will at some point need a manufacturing partner
- Sweden offers an ideal mix of the traditional and modern drug development companies – fits very well with what we're good at
- The UK offers a tremendous manufacturing heritage and with a weak pound...its on the cheap at the minute!
- Cultural similarities and a pleasure to deal with
- Strong support networks between Sweden and North East England including Swedish Chamber of Commerce, UKTI and the Seagull project
- To make friends, contacts and to do business.

# SCM Pharma – who we want to talk to...

We are here to meet people working across drug development –

Biotech & virtual

Big and speciality  
pharma companies

Medical device  
developers,  
universities &  
other healthcare

CROs, CMOs &  
supply chain

- Those developing novel, difficult & dangerous drugs and/or requiring a bespoke process to assist with the supply of product for pre-clinical and clinical trials
- Those requiring a manufacturing partner for the supply of commercially licensed medicines in niche/low volume markets

**We like a challenge...**

**Thank you**

**Any questions?**
